

MOVING WITH NEWTON

KEY CONCEPTS

Review with your students before your visit. Students should be familiar with basic lab techniques such as using a microscope and following written lab procedures.

ACCELERATION

A continuing change in speed or direction of a moving object; it can mean going faster, slowing down or changing direction.

SPRING SCALE

A tool that uses a spring to measure force.

NEWTON

A unit used to measure force.

MASS

The amount of matter contained in an object.

FORCE

A push or pull that causes an object to move.
