

### Science Leadership School Partners Program: Time Requirements for Returning School Partners (Year 3)

This table outlines the minimum recommended time necessary to support all program components. Innovation and change in science education happen over time. Schools who can allot more time to the process will see a higher rate of change.

In Year 3, School Partners continue to use MSI's School Support Tool as a team to advance the school's science program with greater depth, continuing the work from Year 2. By the end of Year 3, teams will reflect on their school's growth and plan for sustaining the work.
